Abdalrahman Sherif

Software Engineer | Frontend & Full-Stack | React, TypeScript,
Node.js & Python | Enterprise Platforms & Automation
Abu Dhabi Emirate, United Arab Emirates

Summary

Full Stack Developer experienced in building enterprise React/TypeScript platforms, Node.js APIs, AI-enabled tools, and workflow automation for large-scale UAE operations. At Trojan Holding, I drive frontend architecture and UI/UX delivery for TBMS v3.0, supporting 50,000+ employees across employee services, approvals, dashboards, authentication, and API-connected workflows. My experience also covers Python, computer vision, n8n automation, and manual and automated testing with Jest, Playwright, Postman, and SQL.

Experience

Trojan Construction Holding

Software Engineer

December 2024 - Present (1 year 10 months)

United Arab Emirates

- Drive frontend architecture and UI/UX delivery for TBMS v3.0, a React and TypeScript enterprise platform supporting 50,000+ employees across departments and UAE project sites.
- Build reusable components and end-to-end employee-service workflows covering attendance, requests, approvals, profiles, dashboards, and role-based access—delivering consistent experiences for users from executive leadership to site teams.
- Modernized the TBMS dashboard using Ant Design, Tailwind CSS, and ApexCharts, transforming complex operational data into a clearer, responsive, and more intuitive user experience.
- Developed a UAE ICP-compliance computer-vision system using Python, OpenCV, and APIs to identify image-dimension, contrast, quality, and eligibility issues before HR and filing review.
- Engineer internal automation solutions using React, Python, APIs, and n8n to generate HR documents, automate reports and email workflows, reduce repetitive data entry, and strengthen processing accuracy.

- Strengthen release quality by designing and executing manual and automated tests with Jest and Playwright across employee services, approvals, dashboards, authentication, API-connected modules, and responsive UI states.
- Identify, reproduce, and document defects using Postman, SQL validation, and structured QA matrices while supporting SIT, UAT, regression, and cross-browser testing cycles.
- Implement secure authentication and API-connected workflows using Microsoft MSAL, Azure AD, JWT handling, React Router, REST services, and session-expiry controls.

Studypool

Freelance Developer

June 2022 - June 2023 (1 year 1 month)

California, United States

- Built and delivered software solutions for global clients across web development, backend logic, algorithms, databases, debugging, testing, and technical research.
- Built full-stack web applications, REST API features, automation scripts, and programming solutions across JavaScript, React.js, Python, PHP, Java, C++, and C#.
- Achieved Top 1% platform-wide recognition through consistently high client ratings, delivery quality, clear communication, and technical support standards.

Education

Arab Academy for Science, Technology and Maritime Transport

Bachelor's degree, Computer Science · (September 2020 - September 2024)

University of Northampton

Bachelor's degree, Computer Science · (September 2020 - July 2024)
